

## ACCELERATING THE VALUE OF INSURANCE

*Insurance is a fundamental pillar of the global economy, critical to the infrastructure of commerce and the livelihood of individuals and their families. Without insurance, world trade grinds to a halt. At this historical inflection point, leading insurers are compelled to implement sustainable strategies and drive innovation to reduce the protection gap and strengthen societal resilience. The challenge is to harness the exponential growth of data with transformational technologies to deliver customer propositions that better serve society by Accelerating the Value of Insurance.*
